

Personal Pecan Cracking Order

There are many types of pecans. Some pecans shell very efficiently and others very poorly. Also, pecans vary greatly in quality. It is questionable whether purchasing automated cracking services is “worth it” if the pecans do not shell well, are small, or are of poor quality. State law requires we wash and sanitize your pecans with our approved method. We wash, sanitize (1000 ppm min Sodium Hypochlorite) and dry the pecans before they are put in our machines. You will have to leave the pecans at our facility and pick them up later.

Pecans will be inspected for **Pecan Weevil damage**. Pecans found with weevil damage will not be processed. The customer is advised to dispose of those pecans by burning them. Our area does not have weevils and we don't want them. Do **not** throw them out on the ground!

Several options available:

_____ **Just cracked. \$1.00/ input pound.** Processed through cracker. Pecans mostly intact. You have to “peel” them. Most dislodged shells are removed by vacuum machines.

_____ **Shelled. \$2.00/ input pound.** Processed through cracker, sheller, and sizer. Some dislodged shells removed by vacuum machines. Lots of shells mixed in with meats. **You have to do all sorting.**

_____ **Shelled and computer sorted. \$3.00/ input pound.** Processed through cracker, sheller, sizer, and inspection computer. Most dislodged shells removed by vacuum machine and computer. You still have some sorting of shells. You will also get a bag of computer rejects that you may want to hand sort.

_____ **All the way. \$4.00/ input pound.** Processed through cracker, sheller, sizer, inspection computer and our manual final inspection. Most shell removed but you should inspect for shells. You still may have some sorting of shells. You will also get a bag of computer rejects that you may want to hand sort. We will not sort computer rejects.
